Comments

(Set forth by above question #, if applicable.  
Use "Additional Comments" Sheet, if needed)

File #: 95-290381

#1: With microscopic hair examination, even with the best notes, there is no way to determine the examination was performed correctly.

#2: The examination results set forth in the laboratory report are supported by the bench notes, but the documentation is marginally adequate. The notes are not dated or initialed and are in pencil. The bench notes do not document why the Negroid hair recovered from Q5 (victim's jumpsuit) is not suitable for comparison. The notes conclude items Q4 and Q5 are torn, but there is no documentation of the observed characteristics leading to that conclusion.

#3: Malone testified that "I processed all the items for hair and fibers" and "I removed all the hairs from these

#3 (continued): items". The notes indicate, and this reviewer has been told, that technicians process and recover the hair and fiber evidence and that Malone didn't do technician work.

Malone testified twice that the hair recovered from the quilt and the jumpsuit are Negroid hair "fragments". His laboratory report does not state that the hair are fragments. (see #4 below)

#4: Malone's bench notes do not indicate the Negroid hair recovered from Q5 and Q6 are fragments. His notes are not consistent with his testimony concerning this.
